

## Sprint Review 1

### Overall

A Sprint Review meeting was conducted on Friday 31/01/2020 at 12:45pm. This meeting was held in the Queen Mother Building and involved stakeholders from Craneware, and the Scrum development team, including Scrum Master.

The development team talked through the Sprint 1 and showcased what had been developed thus far. During this, the Clients highlighted areas of possible improvement and suggested changes to be made.

### Client Feedback

The following points highlight the main elements of the feedback that the client provided us with.

- The map and output table on the website page, should be placed next to each other.
- Sliders were suggested to be implemented for the input boxes
- Website should allow filtering by distance in search.
- The following information should be displayed on the popup
  - Treatment
  - Price
  - Address
- The “*Contact Us*” section is a low priority and not something that we should necessarily concern ourselves with.
